## Additional information

I have some app uploaded to Google Play Store. Updated data at <http://alberto-alonso.com>

1. My final project at University which work with SQLite, CSV. [Link](#)
2. Three guides of the three universities in Galicia (Spain) with Augmented Reality, Geolocation... Universidad de [Vigo](#), de [Santiago](#) y de [Coruña](#).
3. A QR code generator which let you save it in your SD and share it with your installed apps. [Link](#)
4. An assistant to remember four locations and parking data. Using Google Maps Api V2 and with desktop widget. [Link](#) Where is... ?

There is also a version of the android app "Where is ... ?" for iPhone. This version is optimized for iOS 6 using new maps and instead of android widget you can check your notification bar to remember your parking spot. [Link](#)
